

Project Log 1

Backend engineer with 9 years of experience building reliable data platforms, developer tooling, and logistics systems. Focused on measurable reliability and delivery improvements.

- Led migration of 40 services to a shared deployment platform, reducing release time by 35%.
- Designed an event pipeline processing 2,000,000 records per day with 99.9% availability.
- Mentored 6 engineers.
- Automated compliance reporting, saving \$120,000 per year in manual review effort.

Project Log 2

Backend engineer with 9 years of experience building reliable data platforms, developer tooling, and logistics systems. Focused on measurable reliability and delivery improvements.

- Led migration of 40 services to a shared deployment platform, reducing release time by 35%.
- Designed an event pipeline processing 2,000,000 records per day with 99.9% availability.
- Mentored 6 engineers.
- Automated compliance reporting, saving \$120,000 per year in manual review effort.

Project Log 3

Backend engineer with 9 years of experience building reliable data platforms, developer tooling, and logistics systems. Focused on measurable reliability and delivery improvements.

- Led migration of 40 services to a shared deployment platform, reducing release time by 35%.
- Designed an event pipeline processing 2,000,000 records per day with 99.9% availability.
- Mentored 6 engineers.
- Automated compliance reporting, saving \$120,000 per year in manual review effort.

Project Log 4

Backend engineer with 9 years of experience building reliable data platforms, developer tooling, and logistics systems. Focused on measurable reliability and delivery improvements.

- Led migration of 40 services to a shared deployment platform, reducing release time by 35%.
- Designed an event pipeline processing 2,000,000 records per day with 99.9% availability.
- Mentored 6 engineers.
- Automated compliance reporting, saving \$120,000 per year in manual review effort.

Project Log 5

Backend engineer with 9 years of experience building reliable data platforms, developer tooling, and logistics systems. Focused on measurable reliability and delivery improvements.

- Led migration of 40 services to a shared deployment platform, reducing release time by 35%.
- Designed an event pipeline processing 2,000,000 records per day with 99.9% availability.
- Mentored 6 engineers.
- Automated compliance reporting, saving \$120,000 per year in manual review effort.

Project Log 6

Backend engineer with 9 years of experience building reliable data platforms, developer tooling, and logistics systems. Focused on measurable reliability and delivery improvements.

- Led migration of 40 services to a shared deployment platform, reducing release time by 35%.
- Designed an event pipeline processing 2,000,000 records per day with 99.9% availability.
- Mentored 6 engineers.
- Automated compliance reporting, saving \$120,000 per year in manual review effort.

Project Log 7

Backend engineer with 9 years of experience building reliable data platforms, developer tooling, and logistics systems. Focused on measurable reliability and delivery improvements.

- Led migration of 40 services to a shared deployment platform, reducing release time by 35%.
- Designed an event pipeline processing 2,000,000 records per day with 99.9% availability.
- Mentored 6 engineers.
- Automated compliance reporting, saving \$120,000 per year in manual review effort.

Project Log 8

Backend engineer with 9 years of experience building reliable data platforms, developer tooling, and logistics systems. Focused on measurable reliability and delivery improvements.

- Led migration of 40 services to a shared deployment platform, reducing release time by 35%.
- Designed an event pipeline processing 2,000,000 records per day with 99.9% availability.
- Mentored 6 engineers.
- Automated compliance reporting, saving \$120,000 per year in manual review effort.

Project Log 9

Backend engineer with 9 years of experience building reliable data platforms, developer tooling, and logistics systems. Focused on measurable reliability and delivery improvements.

- Led migration of 40 services to a shared deployment platform, reducing release time by 35%.
- Designed an event pipeline processing 2,000,000 records per day with 99.9% availability.
- Mentored 6 engineers.
- Automated compliance reporting, saving \$120,000 per year in manual review effort.

Project Log 10

Backend engineer with 9 years of experience building reliable data platforms, developer tooling, and logistics systems. Focused on measurable reliability and delivery improvements.

- Led migration of 40 services to a shared deployment platform, reducing release time by 35%.
- Designed an event pipeline processing 2,000,000 records per day with 99.9% availability.
- Mentored 6 engineers.
- Automated compliance reporting, saving \$120,000 per year in manual review effort.

Project Log 11

Backend engineer with 9 years of experience building reliable data platforms, developer tooling, and logistics systems. Focused on measurable reliability and delivery improvements.

- Led migration of 40 services to a shared deployment platform, reducing release time by 35%.
- Designed an event pipeline processing 2,000,000 records per day with 99.9% availability.
- Mentored 6 engineers.
- Automated compliance reporting, saving \$120,000 per year in manual review effort.

Project Log 12

Backend engineer with 9 years of experience building reliable data platforms, developer tooling, and logistics systems. Focused on measurable reliability and delivery improvements.

- Led migration of 40 services to a shared deployment platform, reducing release time by 35%.
- Designed an event pipeline processing 2,000,000 records per day with 99.9% availability.
- Mentored 6 engineers.
- Automated compliance reporting, saving \$120,000 per year in manual review effort.
